1. Minimum safety factor,  $\Omega$ , for tabulated values is 2.1.
2. Multiply tabulated values by 1.5 to obtain minimum Load and Resistance Factor Design (LRFD) values.
3. Tabulated values require that minimum grade 8.8 threaded rods must be used.
4. Tabulated values are for assembly shown in Figure 18. Design Professional is responsible for checking strength of supporting steel member.
5. Tabulated values are based on friction that is provided mechanically and not due to gravity loads.
